Second Task:

# Design of test run

Track : Industrial and Systems Engineering.

Name \ Fahad Mohammed Alnefaie
E-mail \ fh333rr@gmailcom
Whtsapp \ 0537001686

**Requirement and Analysis :**

**1-Pilot robot: It can take off the plane and land accurately to ensure the safety of passengers**

---

**2-Hotel worker robot: it guides guests to their rooms, guides them to some available services, gives guests their bills and many other tasks.**

**Design:**

***We designed the wheels suspension system in the course of mechanical engineering.**

---

**Testing unit :**
